

**CEDAR GROVE HYDRANT FLUSHING
SET THIS MONTH**

Cedar Grove to conduct its Fall Hydrant Flushing Program starting **Monday, October 22, 2018, and ending Thursday (if needed), October 25, 2018.**

The flushing will begin with hydrants in South end of town and proceed Northward. Flushing will be done between the hours of 7:00pm and 12:00 Midnight.

Because it is difficult to pinpoint the exact neighborhood where flushing will occur at a given time, residents are advised to bathe before 7:00pm and store sufficient water for their breakfast needs. Residents are also advised not to do laundry for 24 hours after their neighborhood hydrants have been flushed, as the water may discolor clothing.

Discoloration of water can be expected for 24 to 36 hours after flushing. The discolored water is not harmful, but residents should briefly run their faucets to clear the discolored water.
